Summary

AI Engineer with a strong background in Python, AI/ML, and secure software development, supported by a recent B.S. in Computer Science. Developed AI-powered tools to enhance data analysis efficiency and contributed to building cloud-based platforms with advanced automation. Experience delivering technology solutions that improve accessibility and planning accuracy. Eager to apply AI expertise and technical strengths to create innovative AI-driven applications.

Education

Florida Polytechnic University

Aug 2021 - May 2025

Bachelor of Science, Computer Science

Lakeland, FL

- **Coursework:** Secure Software Engineering, AI/ML, Data Mining, Operating Systems, Software Development, Data Structures, Algorithms & Design, Deep Learning, Computer Networking

Skills

- **Languages:** Python, JavaScript, Bash, C++, Java, SQL, HTML, CSS, C, typescript
- **Tools:** GitHub, CI/CD Pipelines, React, Ubuntu Linux, Virtual Machines, AI, Generative AI, RAG, Front-end Frameworks, Next.js, React-router, React, tailwind, redux, PostgreSQL, LangChain, LlamaIndex, Large Language Models, Vector Databases
- **Security:** OWASP Top 10, Vulnerability Management, Secure Coding, Application Security Principles
- **Soft Skills:** Communication, Leadership, Collaboration, Reliability, Adaptability

Projects

CivilAI: Municipal Code Assistant - AI Developer | <https://github.com/williamT03/CivilAI/tree/main>

Dec 2025 - Present

- Developed a full-stack RAG system for municipal code analysis using FAISS, BM25, and LLMs (LLaMA/DeepSeek)
- Implemented hybrid retrieval + cross-encoder reranking to improve legal text search accuracy
- Developed FastAPI backend and Next.js frontend for real-time AI query interface
- Designed evaluation metrics (Precision@7, Recall@9) to benchmark retrieval performance

Predictive Policing Software - Developer | <https://github.com/williamT03/Predictive-Policing>

Polk County Sheriff Department

- Designed and deployed a predictive policing platform with LLMs and crime clustering algorithms
- Achieved 95% prediction accuracy and built an interactive map interface with live data updates
- Integrated the model into a web-based dashboard hosted on a personal cloud server

Video Summarization Program - ML Developer | <https://github.com/williamT03/Video-summarization/tree/main>

Florida Polytechnic University

- Designed a video summarization system comparing traditional computer vision techniques with Transformer-based deep learning models
- Implemented models to extract keyframes and evaluate performance across efficiency and accuracy metrics
- Demonstrated that Transformer models provided comparable accuracy to CV methods while achieving significantly higher efficiency
- Documented findings and codebase on GitHub for reproducibility and academic contribution

Linux Server Deployment - Systems Engineer | filecloud.willcloudlab.com

- Designed and maintained a secure Ubuntu-based Linux server to host personal cloud storage, testing environments, and automation tools
- Deployed FileCloud to create a private cloud platform with backup and remote access capabilities
- Utilized Docker to containerize and manage core services, improving modularity and system reliability
- Developed a virtual machine lab on the server for experimentation with OS, security, and application environments

Portfolio Website - Frontend Developer | resume.willcloudlab.com

- Built a responsive, mobile-friendly portfolio site using HTML, CSS, and JavaScript to showcase development projects and skills
- Integrated a clean, user-friendly interface to highlight key accomplishments in AI, backend systems, and full-stack development
- Engineered a custom resume generation solution to simplify and streamline applicant portfolio sharing

Other Work Experience

Walt Disney World | *Lifeguard Trainer*

May 2023 - Present

- Customized training plans for new lifeguards, ensuring they are personalized and adaptive to each trainee's learning style, resulting in better preparedness.
- Developed and executed lesson plans for twice-monthly training classes, improving participant engagement and understanding
- Ensured the safety of guests and staff by implementing safety protocols and maintaining high guest service standards.

Kimley-Horn | *GIS Intern*

May 2022 - Aug 2022

- Surveyed public walkways to collect and update data for ADA compliance, ensuring accurate and up-to-date information for city planning and accessibility improvements

Honors & Achievements

- **Disney College Program Graduate:**Developed skills with customer service, collaboration and, networking.
- **Frontend Simplified Certification:**Developed Skills in Frontend development
